

Whose values guide technological change?

2025 economics Nobel: useful knowledge, innovation, and creative destruction

 Mokyr
Knowledge and institutions

 Aghion and Howitt
Higher quality through replacement

A Measured representation

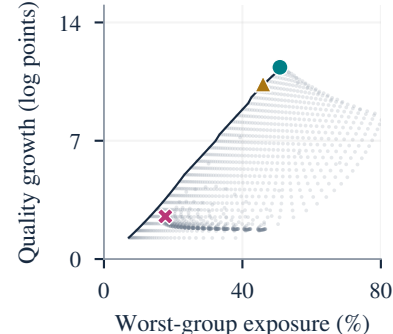

64 countries; six questions
Most improvement: Q106/Q108

B Simulated transition boundary

Perceived limits change;
actual paths follow policy choices.

C Simulated outcomes

Same system and spending
Low exposure can reflect
stalled adoption.
