

● Cumulative innovation gain

■ Mean worst-group needs

..... Reference parameter

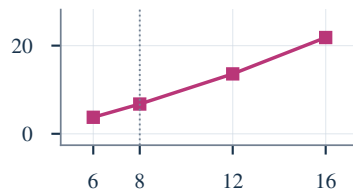

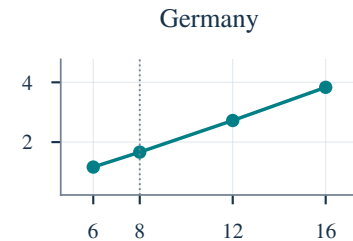

Economic quality jump 100q (%)

First / reference / last parameter

G 0.904 / 1.287 / 2.957

Needs (%) 3.48 / 5.65 / 16.46

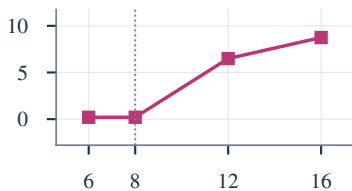

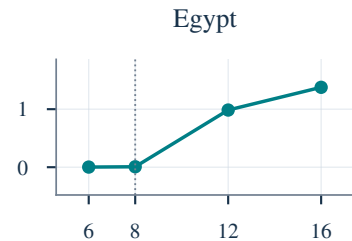

Economic quality jump 100q (%)

First / reference / last parameter

G 1.165 / 1.665 / 3.833

Needs (%) 3.74 / 6.75 / 21.84

Economic quality jump 100q (%)

First / reference / last parameter

G 0.002 / 0.007 / 1.377

Needs (%) 0.20 / 0.20 / 8.75

Every point reoptimizes the same problem. Numeric keys give first, reference, and last outcomes.

Larger economic quality jumps increase growth and needs. This is separate from a GPT version update.
