

..... Unsubsidized — Human rule - - - GPT-5.5 - . - GPT-5.6 Sol — Planner

A Feedback depends on needs

B A steady rate adds quality

A: arrows = local change; open circle = start; star = tested endpoint. B: planner endpoint $G = 1.665$.

Germany: needs settle at (6.75%, 3.26%); the log-quality growth rate approaches 0.01665 per model-time unit.
